

# Endodontic Associates

1960-2010

## 50 Years

of Serving Southeast Michigan

Committed To Be:

Technically Excellent,

Academically Current,

To Render Quality Patient Care,

And to be Conveniently Available.

ENDODONTIC

ASSOCIATES

1960-2010

Endodontic Associates was established in 1960 and has been providing the highest degree of personalized care for over 50 years. The doctors of Endodontic Associates are grateful to the members of the dental community for their continued confidence and support they have shown us over the past 50 years.

Endodontists are dentists with advanced training in root canal treatment and surgery. Endodontic Associates uses the latest anesthesia techniques, high-powered operating microscopes, and cutting edge digital radiography technology to treat the most complicated cases for a positive patient experience with predictable, effective results. The purpose of root canal treatment is to preserve the natural tooth and avoid extraction. Nothing looks, feels or functions like your natural tooth and the experts at Endodontic Associates allow for virtually pain free treatment.

With 10 offices and 17 endodontists, Endodontic Associates is *an extension of your dentist's practice*. Our *come right over* emergency appointments and convenient geographic locations make us always accessible.

**ROOT CANAL TREATMENT IS ALL WE DO.**

*Some things in life demand total expertise. Your dental health should be one of them.®*
